

TPR TOKEN WHITEPAPER

overview of the token, utility, allocation and future plan

TOKEN

TPR

NETWORK

BNB Smart Chain

TOTAL SUPPLY

10,000,000

STATUS

Private Swap Live

Contract: 0x1e0bfda5d13e3d50596cf91029336c7c0d365cd7

Version 1.2 | July 2026 | Informational document

A utility token for a growing digital ecosystem

TPR is the native utility token for The Profit Riders ecosystem, connecting wallet-based participation, private swap access, referral-led community growth, platform packages and future services.

Utility

Platform access, packages, services, community benefits and future ecosystem functions.

Transparent Supply

Published total supply: 10 million TPR.

Private Swap Today

Users can buy TPR with USDT through the project swap interface.

Market Expansion

Future plan: PancakeSwap first, then applications to selected centralized exchanges.

Core Positioning: TPR is designed as the utility and access layer of The Profit Riders platform, not only as a tradable asset.

Token identity and key characteristics

Key token information for simple user understanding and public presentation.

Long Name	The Profit Riders Token
Short Name / Symbol	TPR
Blockchain	BNB Smart Chain (BEP-20)
Contract Address	0x1e0bfda5d13e3d50596cf91029336c7c0d365cd7
Published Supply	10,000,000 TPR
Primary Role	Native ecosystem utility token
Current Access	Private TPR/USDT swap and referral ecosystem
Future Access	PancakeSwap and selected CEX applications, subject to approval

Specialization

Utility-first token for use inside the Profit Riders ecosystem.
Wallet-based transfers and swap access on BNB Smart Chain.
Community utilization through referral participation and packages.
Planned integration with AI tools, travel, insurance and platform services.

Simple fixed-supply token positioning

The token is positioned as a standard BEP-20 utility token. Users should verify live contract permissions and ownership status on BscScan.

Fixed Supply

Published supply is 10,000,000 TPR.

No Arbitrary Balance Edits

Admin should not be able to seize or edit user balances.

No Hidden Transfer Tax

Ordinary transfers should remain simple and predictable.

No Upgrade Dependency

Token logic should remain as deployed.

Public Verification

Contract address is visible on BscScan for independent review.

Verification note: this PPT is editable and informational. Final claims about admin permissions should be confirmed from the live verified contract or audit report.

Proposed ecosystem allocation of 10 million TPR

A simple allocation model for publication and discussion. Edit quantities or percentages as needed before final release.

Category	%	TPR Quantity	Purpose
Community & Referral Utility	30%	3,000,000	User acquisition, referral utility and community campaigns.
Ecosystem & Platform Rewards	20%	2,000,000	Platform participation, holder utility and product incentives.
Liquidity & Market Making	20%	2,000,000	DEX liquidity and future exchange liquidity support.
Development & Operations	12%	1,200,000	Technology, security, product and operations.
Strategic Partnerships	8%	800,000	Integrations, merchants and ecosystem partnerships.
Marketing & Global Growth	5%	500,000	Education, brand growth and regional expansion.
Reserve & Risk Fund	5%	500,000	Long-term reserve and risk planning.

How TPR is used today

At present, utility is centered on the platform, private swap and community referral system.

01

Private Swap

Users connect wallet, approve USDT and buy TPR using the current contract-based price.

02

Referral Utilization

Supports community-led participation and referral-based ecosystem growth.

03

Packages & Access

Can be used as part of platform participation and package-related utility.

04

Holder Benefits

Eligible holders may receive platform benefits under current published terms.

05

Future Services

Planned wider use across AI tools, travel, insurance and digital services.

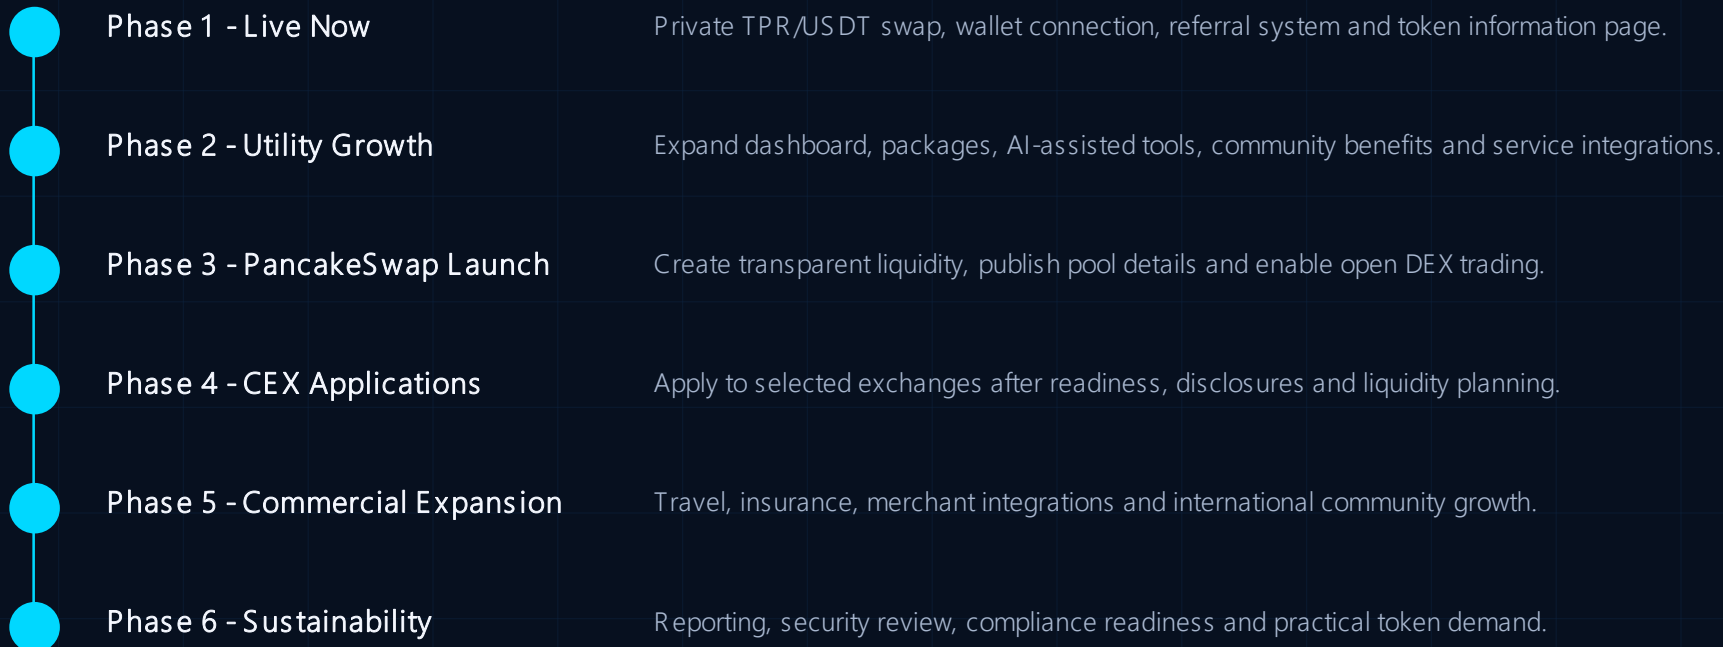

Approval-led TPR and USDT exchange

The current private swap lets users buy TPR with USDT through wallet connection, approval and contract-based pricing.

From private utility to wider market access

A practical sequence for expanding from platform utility to broader liquidity and ecosystem usage.

DEX first, then exchange applications

Exchange names are roadmap targets only. Listings require review, due diligence, liquidity and approval by each platform.

PancakeSwap

First planned open DEX market on BNB Smart Chain.

MEXC

Potential centralized exchange application target.

Gate.io

Potential centralized exchange application target.

BitMart

Potential centralized exchange application target.

KuCoin

Potential centralized exchange application target.

Participate responsibly

Digital tokens involve market, liquidity, smart-contract, cybersecurity, operational and regulatory risks.

Important Notice

This document is for project information only. It is not an offer, guarantee, investment recommendation, legal opinion or financial advice. Users should verify the contract, token permissions, platform terms, wallet approvals and applicable laws before participating.
